BASIC-ABSTRACT:

NOVELTY - Goods video, brand name and goods information including the price data acquired from current goods master file are displayed and the data are loaded in a web server. The visitor and client access the homepage containing goods information through internet.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for goods information providing system.

USE - To provide goods information about goods in supermarket.

ADVANTAGE - Price modification is performed in real time on comparison of prices set for goods in other shops. Goods sale is performed efficiently at a low investment by increasing the customer's interest.

DESCRIPTION OF DRAWING(S) - The figure shows the display of goods information.
